📄 Profile

Bachelor of Information Technology graduate (GPA 3.76) from Udayana University, specializing in Data Science. Proven expertise in developing end-to-end Machine Learning solutions, from real-time computer vision models to scalable cloud deployment using Google Cloud Platform. Experienced in building robust web applications and managing backend infrastructures for mobile platforms.

🎓 Education

08/2021 – 06/2026 **S1 - Information Technology, Data Science Concentration (GPA 3.76)**
Universitas Udayana
Relevant Coursework: Statistics, Data Analytics and Visualization, Data Mining, Machine Learning, Deep Learning, Computer Vision and Web Application Development.

📁 Project Experience

06/2025 – 01/2026 **SibiTrans - Web Learning for Indonesian Sign Language (SIBI)**
Thesis Project
Impact & Technology:

- Developed a real-time Indonesian Sign Language (SIBI) recognition system using Flask and Mediapipe, successfully implementing MLP models for accurate gesture classification.

01/2025 – 04/2025 **Facial Expression Recognition Dataset Generation**
College Project Member
Impact & Technology:

- Leveraged advanced image generation techniques to produce diverse facial expressions for model training accuracy.
- Focused on data augmentation and classification of human emotions from facial features.

08/2023 – 01/2024 **Parental Peace - Parent Support Mobile App**
Bangkit Capstone
Impact & Technology:

- Architected and deployed backend APIs and Deep Learning models using Node.js and Google Cloud Run. Optimized system scalability and reliability to support real-time consultation features for mobile users

📜 Certification

Bangkit led by Google, Goto, and Traveloka Cohort
Cloud Computing Cohort Duties and Responsibilities:

- Developed authentication and storage backend API with JavaScript and Node.js.
- Deployed the backend & deep learning model with Cloud Run in Google Cloud.

🧠 Skills

Machine Learning & Data Science: Python, TensorFlow, MediaPipe, Data Mining, Deep Learning.

Design: Figma, Canva

Web & Backend Development: Node.js, Flask, JavaScript, Streamlit, GitHub

Cloud & Infrastructure: Google Cloud Platform (Cloud Run, Storage), Docker.
